Tenth street to Eighth avenue, and continues along below the Harlem Heights. The great height, combined with the exposed condition of the track, for no houses protect it from the terrible gusts that beat upon it, render it apparently very dangerous; but experts assure us that a little care on the part of the appringers will prevent any trou-

of the engineers will prevent any trou-

ble. At all events, the wind blows with fearful force against the aerial sta-

tion, snd the trains seem to rock be-neath its power. There is something so delightfully novel about this eleva-ted traveling, that the New Yorkers are in ecstacies over it. Instead of the dis-

mal old street cars-cheerless, dirty, cold, jolting over uneven tracks, and

halting at every corner—they are pre-sented with so many palatial steam cars, running aloft in the air, and whirling them from station to station

with poetical luxury; while on Ninth and Eighth avenues the beautiful Hud-

son may be seen from the windows, flanked with massive Highlands and

bedecked with numberless early ships. From Third avenue, too, the East river may be seen, with all its islands and its

endless traffic; and, at the furthest ter-minus of the Eighth avenue line, the

Mooresville or Statesville: but of this

much we are assured: if we the people

of South Iredell, Western Rowan, Davie and Forsythe, do construct a good broad-gauge road-bed, then and upon

that condition the very responsible par-

ties above referred to will adopt our line from Mooresville to Winston-Sa-

ties give assurance that they will do their full part. The division which at once threatened to weaken the strength

of Winston and Salem upon this ques-

tion, is, we are informed, happily har-

tion there in doing all that is necessary

to secure this grand enterprise. The most responsible citizens of Davie

county, even those who were opposed

to a County subscription for a local narrow-gauge Road, are promptly coming forward and strongly favoring

every necessary aid to the great Mid-land. On this side the South Yadkin,

public spirit in regard to the Road has

vastly improved; the same may be said

here as in Davie, many strong and in-

fluential men who opposed the town-

ship subscriptions, are out and out for

ness to throw dirt. A month ago, we

honestly doubted our ability to prepare

a proper road-bed from Mooresville to

the South Yadkin; we horestly believe

now that the means can and will be raised. But it can be done only by

continued agitation and by the unre-mitting efforts of the public spirited

men all along the line. The opportunity is before us and before Statesville

teo. On Wednesday, Colonel Yates Civil Engineer with a corps of assist

anis, by direction of Mr. Barbour, com-menced the survey of an experimental

line from Statesville towards the South Yadkin. This is right, is due to States-

Davidson. Waggoner. Motion was made before Superior Court Clerk of cution upon a judgment obtained by plaintiff against defendant at Spring term, 1868. Clerk granted motion and issued execution to sheriff of Forsyth who levied upon a tract of land, the property of defendant, and was pro-ceeding to se'l when defendant obtained a restraining order from Judge Schenck. It was agreed between the parties that the application for restraining order should be treated as a mo-

When sheriff read notice to defendant, he informed the sheriff that he had a discharge in bankruptcy, dated 9th October, 1873. Sheriff told him that he would have to go to Lexington, or else write to plaintiff. Sheriff promised that he would write, both thinking that would answer. The defendant was so indifferent about the proceedings that he never inquired of sheriff if he had written, and gave himself no concern about the matter until the execution was in the hands of the sheriff This was gross neglect. At January term, 1880, His Honor adjudged that the order was not made through mis-take or excusable neglect of defendant.

Moore, et al.) Indictment for an affray in the usual form. Motion in arrest of judgment because indictment did not charge tha deadly weapon was used and serious damage done or that the affary occurred more than six months before the finding of the bill.

In framing an indictment for such an offense it is not necessary to aver that the offense was committed more than six months before finding the bill and that no Justice had taken cognizance of it. This is matter of defense, like the statute of limitations. In this case there is no averment of the use of a deadly weapon, the defendants are found guilty of only an affray, and it is not made to appear that the bill was found within six months and that a Justice had taken cognizance of the same, the Superior Court has jurisdic-

Action was brought in jus tices court on the forty-nve days note which was credited by \$125 paid on Jan. 27, 1876. The defence was that at the time of the credit on the note sued on, the defendant had paid plaintiff \$250 and directed him to the payment of the open accounts and the balance to be credited on thirty days note. plaintiff did not do this, but had credited the sum paid in equal parts on the two notes thus keeping on foot four causes of action against the defendant, within a justices cognizance. Appeal from judgment of the Supeant to set aside a judgment of the Superior Court refusing motion of defendant to set aside a judgment on the ground of excusable neglect under C. C. P., sec. 133.

His Honor overruled defendant's motion to set aside the judgment. Every person against whom a suit is brought ought to come into court and be attendant at its terms throughout the litigation, in person or by attorney in fact, so as to look after and follow up his defense, if he fails in this it is negligence and concludes him in any judgment entered against him; unless he be able, as allowed by sec. 183, C. C. P., to be relieved by facts sufficient in law to excuse his neglect. The burden of proof is always on the party in default, and he must show facts not barely suf-ficient, but so clearly, sufficient in law to ficient, but so clearly sufficient in law to excuse the neglect, as to call for the exercise of the discretion of the Judge and to make the refusal to vacate appear to be an abuse of his discretion.--Slade vs. Rollins 76, N. The facts of this case fail to show any abuse of his Honor's discretion in reabuse of his Honor's discretion in refusing to vacate the judgment on the defendant's motion. The judgment is a Birmed, and this will be certified.

The Network of London Railways.

London Echo. It will rather startle the metropolitan reader, who thinks of the various railways in and under and round London as the simplest and most ordinary means of locomotion, to be told that the rails used by the companies within a radius of six miles of Charing Cross would form a single line from London to John O'Grant's house, a distance of 760 miles. This estimate does not indude the rails in bays and sidings, but it includes all double, treble or quadruple tracks. Leaving all duplicate lines aside, the incredible number of 200 miles of railway is in daily operation in the metropolitan district. From Hendon and the Alexandria Palace on the North to Penge and Streatham on the South, from Forest Gate to Woolwich on the East to Acton and Willesden in the West, thir een different companies hold sway, not including the East Loadon, whose line is worked by another company. There are also six short lines, varying from four and three-quarter miles to one mile in length, owned and worked by the compames jointly. The Brighton Company owns the greatest mileage in the metropolis — thirty seven miles. It is closely run by the Great Eastern with thirty - two. Then comes the London and southwestern with twenty-seven; the London, Chatham and Dover and Northwestern follow with twenty-four each. So far as using the lines are concerned, the Lond n and Northwestern run over more than one fourth of the whole metropolitan system. The trains of this great company use the lines of five other companies, practically adding forty-four miles to their own system. The Great Northern has running powers over the lines of six companies, embracing thirty-six miles. The mixed nature of the metropolitan system is apparent in the fact bat over the London, Chatham and Dover Railway five companies run

their trains. The Metropolitan company's lines are open to four companies. The Southwestern alone uses no other lines, though it has running pow ers over the East London. If we add to this astonishing system of locomo-tion the seventy miles of tramways now open, the omnibuses which ceaselessly traverse the metropolis from one end to the other, the thousands of cabs, the passenger steamers which ply on the river-the magnitude of the means dail, employed by the people of London in getting from one part of the "New Babylon' to another will strike the observant mind. With all this vast traffic the injuries to life and limb, save in the cases of street accidents are com-paratively few. With trains flying paratively few. above ground and underground, over complicated points and through crowded junctions, collisions seldom occur

and seldom result in loss of life.

NEW YORK LETTER.

THE POLITICAL SITUATION AT THE NATIONAL METROPOLIS.

ammany and Anti-Tammany-The Grantites and Anti-Grantites-Other Matters of Interest.

Correspondence of the News

NEW YORK, March 8 .- Our factions here are preparing for strife. Tammany and anti-Tammany, Grantites and anti-Grantites are counting their numbers, and searching in every direction for converts and perverts. Combining present prospects with the result at the last election, there seems to be every probability that the good old Democratic party, purged from the arrogant connection of Tammany, and swelled from the now broken ranks of Republicanism, will win the day. Tammany, once the pride of the Democracy, now sits in the gloom, and scowls upon the nobler world without. Its days seem told, and, unless the harod of some stern Democrat, scorning dictation and devoted to his party, interfere to prevent its fall, the dampness of the tomb will moulder it away.

The Republicans are fast being divi-

The Republicans are fast being divi-ded over the Grant question, and, as Conkling and Cameron are working their schemes with a determined air, and Grant alone appears to have the possibility of nomination, thousands will flock to the standard of Democracy. The "Independents' among them gnash their teeth at Conkling's ignoring them, and threaten a wholesale withdrawal. George William Curtis, too, has a powerful parcy behind him; Tom Nash no longer pictures Grant as an unassuming hero; and Harper's Weekly may yet suggest the Democratic andidate.

The German Republicans and others of this city, together with several Brooklyn associations, and numbers in New Jersey, have protested against the spirit of Third-Termism, and promise that, rather than run the risk of plac-ing Grant as a monarch on the throne of America, they will join in the elec-tion of the candidate from Cincinnati. But who that candidate will be is the

one absorbing mystery.

Tammany has sworn that it shall not be Tilden, but, when we recollect that he same rash oath was taken in 1876, we place little moment therein. Apart from this, however, many leaders in Tammany have said that, much as they oppose Tilden, they will nevertheless uphold him if he be the choice of the convention, and that, all-iniquitous though he appear in their eyes, he is much preferable to Grant. The New York Sun, in a very pleas

ant article, repudiates the assertion made so frequently by Kelleyites and Grantites that it is the mouth-piece of Tilden, and thus refers to the charge: 'The Sun is no more the mout' piece of Mr. Tilden than it is of General Palmer, David Davis, Sanford E. Church,

Lyman Trumbull, Winfield Scott Hancock and Sam Randall. "Every one of these distinguished gentlemen is the mouth-piece of the mouth-piece of any one of them. "Among the almost countless readers of the Sun, there is, probably, no one who is oftener so much surprised

of a morning at what he sees in it than Samuel J. Tilden.
"In fact, when we ourselves look

over the Sun we are often very much surprised at the number of excellent things which we have put into its columus. "We dare say that if Mr. Tilden did the editing of this journal, it would be very differently done. However, read

The World pleads eloquently for Bayard,—eioquently but rarely. That famous speech, reprehensible or not, according to the light in which it be reviewed, has killed every chance of his success. It would be used by his Republican enemies on every occasion, and the spirit of the "bloody shirt' still rankles too bitterly in Northern posoms to look upon the matter with calmness. To nominate Bayard would be to court defeat, and, in a crisis such as the present, where not the merest flaw will pass unscrutinized; the Democracy must act with the greatest possible caution; and Bayard has far too big a heart to wish his party defeat on his account. It is, undoubtedly, a humiliating fact to acknowledge that bigotry has grown so strong, but the fact remains the same, and, in view of it, Bayard must be rejected. Church Palmer, Hanccek, Randall, Turnbull and Davis, have all been suggested but their strength at present, compared with the volume which the Tilden boom is now acquiring, is waning rapidly. They rise on the wind of a moment, and sink again; but he has been growing more powerful every week, and New York candidates are gradualy sinking down to the belief that he is to be the candidate from (incinnatti It is rumored that his friends have se cured three hundred rooms in that city. Montgomery Blair is straining every nerve in his behalf; many west-ern, northwestern, and eastern papers have declared for him; and even the World's enthusiasm is cooling. These facts are very significant. They can facts are very significant. They can-not be disregarded, and, if Tilden does not receive the nomination, it can scarcely be said that it was for lack of support. On this point, however, a New England paper makes some sensible suggestions. "If Tilsome sensible suggestions. "If Til-den be not the nominee of the Democ-

racy," it says, "it will proceed from one of two causes: either he is not anxious to assume the irksome responsibility of Presidential duties, or he thinks that he has little chance of success. The former case is not unlikely when we consider his advancing years: as to the latter, Democrats at large may remember that Uncle Sammy is far to shrewd to take another long and costly campaign unless he can see every of winning the contest. If he thinks he will fail, and no man's power of perception is keener than his, he will by no means accept the nomination As to the feeling in New York, it may be defined as strongly in his favor. A new line of elevated cars has been opened up in this city along First Avenue to Twenty - Third street, and through that street to Second Avenue, along which it continues as far as Six-ty-Sixth street. This is the fourth line that has been established within two years, the others being respectively

on Third, Eighth and Ninth, and Sixth Avenues, whilst on First Avenue the heighth of the new line no where ex-ceeds twenty feet, but, after emerging on Secoud Avenue, it mounts to the alarming heighth of seventy feet in several places. A first glance at the lofty structure is inclined to make one tremble with fear, but, on finding the pillars girded and regirded, and braced above and below, fear is converted into admiration, and we feel that it is a work of perfect safety. At Thirty-Fourth street the line crosses another elevated line at the height of twenty-feet, and the scene there presented, of airy rail-road spanning airy railroad, is one that has provoked a deal of asionishment. At Forty-Eighth street, the track is conducted across a deep valley seven blocks in length, and here reaches its greatest height, seventy-two feet, run-

GREENSBORO, March 8.—Your correspondent has been too busy to seek much news, since his last, the trade in interchange of goods, wares and merchandise in his line having been equal, or better than for a similar period for a long time, and such a throng of wagons and country mercants as have been here with their produce and cash, have taken away a large lot of the wholesale goods of the season, indicating a decidedly better feeling in trade circles, and

edly better feeling in trade circles, and our wholesale men are elated with the bright opening of spring business. Money and articles of exchange seem to be more plentiful and people are more cheerful.

Court has been in session now two weeks, Judge Seymour presiding, his first term here, and I learn the people are well pleased with him.

Politics are being talked of some now, various persons are named for

now, various persons are named for Governor, and old Guilford would be proud if her faithful representative in Congress General A.M.Scales, should be put before the Convention and receive the nomination. There is none sounder, a Conservative of the true style, and one that would run well, take well with the people and oe an honor to the State.
Others speak of Gov. Jarves and others
of Judge Fowle, &c.
Right here allow me to extend you

an invitation to the proposed grand celebration of the Battle of Guilford court house, sometime in the year 1881, on and we don't propose to make any small thing of it. It is too soon, how-ever, yet to lay out any plans, but to say a large meeting has been had, and officers selected representing every township in the county, whose duty will be the arrangements.

Rev. Mr. Roundthaler, (Lutheran) of Salem, has been here assisting Dr. Smith in his first communion of the year, at which time four persons joined his church, Presbyterian, and this gen-tleman preached two of as well received sermons as was probably ever de-livered in this church. His manner is easy, his language plain, but fine, earnest and feeling. He comes again tomorrow, to lecture before the Young Men's Christian Association.

I hear of the supposed suicide of a man (of Randolph) by the name of Meed, a wagoner who trades much here, his body having been found in a

stream, a forty pound rock tied to him, and his team standing by.

WORSE AND WORSE. Seven Million Dollars, Exclusive of

Interest. Correspondence of the News. RALEIGH, N. C., March 9 .- An apparently well informed correspondent in your issue of Sunday states the cost of the railroad from Salisbury to Asheville

to have been SEVEN MILLIONS exclusive of interest, or \$50,000 per mile of 140 miles. And this does not include the \$600,000 worth of work done by Swepson and Littlefield on the Paint Rock and Ducktown extensions. THREE HUNDRED AND FIFTY THOUS-

AND DOLLARS. This correspondent, Wake, is understood to be in favor of the Best propo-sition, which is to give the State for the entire Railroad \$550,000 of bonds under a second mortgage stipulated in the body of the instrument to be unforeclosable, and no guarantee whatever for payment of interest.

ELEVEN MILES. Thus, if Best & Co. paid actual cash, they propose to pay for the whole road, including \$600,000 of grading done under Swepson & Co., the cost of eleven miles of the road from Salisbury to

PREPOSTEROUS PROPOSITION, 'S. N. T. P.

P. S.—If this is to be the course of things in North Carolina, the non-taxpayer never will be a tax-payer. By the way, has it ever occurred to the governing class of tax-payers that non-tax-payers had some rights they were bound to respect—some interests in the public property and affairs of State, as well as themselves—viz: the right to be so governed, and the public property and affairs of State so managed, as to afford the non-tax-paying poor man a chance to become a tax-payer and a moderately well off, if not a rich one.

The tax-payer has always taken to himself a good deal in this State, as if the actual laboring men were not they who really bear the burdens of government. But tax our dogs, and then every man will be of equal dignity-a taxpayer.

Don't.

Don't speak angrily to a child. Don't kick a dog when he is asleep. Don' go back on the friends of your parents Don't often visit your neighbors a. meal time. Don't neglect a cough thinking it will cure itself. (Thousands die of consumption by so doing.) Don't forget Dr. Pierce's Golden Medical Discovery, for it cures a cough or cold in one-half the time required by any other medicine, and is the only medicine known that positively cures consumption in its early stages. THE FAMINE CONTINUES.

HARROWING DETAILS OF DIS-TRESS---SLOWLY STARVING.

Thanks Tendered to America for Hes Beneficence --- Landlords Help to Aggravate Destitution.

New York Tribune, 8th.

Further details regarding the famine in Ireland are supplied by Mr. James Redpath, the special correspondent whom The Tribune sent to that country to report the condition of the people. He gives letters from clergymen in each of the four provinces, which show that there is much suffering, and that relief is urgently needed. The writers refer in grateful terms to America, and trace the misery of the people in large part to the landlords, who as a classare

loing little or nothing to relieve them. DUBLIN, Feb. 21. Fourier da not universal in County Cork, but there are parishes in which the Hunger rages. Father P. Madden writes me from Clonskelly that there have been deaths from hunger in his parish. He says:

deaths from hunger in his parish. He says:

My parish contains a population of nearly 6,000 people. It extends six miles by the sea, and north, or inland, about the same. The holdings of the farmers are from thirty to three acres; some few hold larger areas. In ordinary seasons people had work from farmers in tilling the soil and procuring sea-manure at this season of the year. Now the farmers have not the means to crop the land, and they as well as the laboring class are idle.

I know some five or six hundred families in great distress, who are living on

I know some five or six hundred lamilies in great distress, who are living on a meal of gruel in the day, and they will require something for their support for the next four months. Many of the working class go mackerel-fishing, but the season has not set in yet.

I, as a priest, assert that I never saw such widespread want of suffering annual a civilized people. among a civilized people.

DISTRESS IN TIPPERARY.

Tipperary is famous as the fighting county of Ireland. Anybody who is "dying for a fight" can be accommodated in Tipperary. It is a fertile county. It is not the famine district. Yet even there a condition of affairs exist that must touch every generous heart. The Dean of Cashel has addressed me a letter that tells the same sad story of life ter that tells the same sad story of life among the lowly in Ireland that has so often moved the hearts of the civilized

world.

Dean Quirke says:

DEAR SIR: \* \* \* I proceed to give you a plain statement regarding the state of things in Cashel and its vicinity. I don't say there is actual starvation, but there is among all classes, shopkeepers, traders, farmers, laborers and tradesmen, a vast deal of distress. Of all, I think the farmer class, with few exceptions, the most distressed and hopeless. The principal causes of this distress are, first, bad land laws, insecurity of tenure, rack-rents; second, three successive wet and unproductive harvests, coupled with an almost total failure of the potato crop last

year. The farmers here and through the whole country seeing they had no means of paying their rents and their debts, held public meetings, generally attended by the clergy, at which they showed the impossibility of paying the

amount of rent paid in prosperous I presided at one of these meetings, where not one disrespectful word was said of any landlord, but a temperate address from the clergy and farmers was adopted, and a copy sent to each landlord, requesting a substantial abatement for the present year of distress, on account of the failure of the crops and the low prices of farm produce. Only some six or seven paid any attention to this reasonable appeal. While the bulk of the landlords treated the whole proceeding as "Commun-

In some cases the landlord can badly afford a reduction in the rent, and therefore insists on a rent that is now mpossible; but there are cases enough where they are quite able, and yet re-fuse to abate a shilling off a rent that even in good times might be called a

I know an instance where a landlord paid a few pounds for an acre of mead-owing that he bought from a tenant, This payment left one bare year's rent due. He served the tenant with notice

due. He served the tenant with notice to quit for the year's rent and took out an ejectment, which he could not have got had he not paid for the hay.

I know that most of our tenent farmers made scarcely a half year's rent last year off the farms.

I do not say there is actual starvation here, though cases are reported to me that come very near it. I know of persons who, though they have not died of hunger, certainly had their lives shortened by want; and I assert most confidently that had not a Loan Fund Committee in this town been able to get a good sum spared from Fund Committee in this town been able to get a good sum spared from their profits in Cashel, several must have died from starvation. At Christmas they were able to give the poor and unemployed a reasonable dole, and for the past three weeks 150 men are employed by them at 1s. 6d. a day. The Government are making large promises but the amount of procras-

promises, but the amount of procras-tination and red tape that surrounds their proceedings is vexatious.
In conclusion, what I state as coming under my own personal observation here I believe to be the normal state of all the surrounding parishes, where I believe much the same distress prevails. Truly grateful for the warm and generous interest your noble country has taken in our behalf, and the large-hearted aid they are affording to distressed Ireland, I am, etc.

The French trown Jewels. Baltimore Sun.

Since the definite establishment of the French republic, it is urged that it is absurd to mount guard any longer over the crown jewels, which have been handed down to the State from the been handed down to the State from the ancient regime. As early as 1871, in the Bordeax Assembly, M. Herse de Saisy proposed to sell these precious stones and regalia, but, as the then Government was only a provisional one the motion was not considered. Now the motion is renewed by M. Benjamin Raspail, who wishes all these historical relies sold, the proceeds to be devoted Raspail, who wishes all these historical relies sold, the proceeds to be devoted the some useful object, which may be determined hereafter. This is urged by the Happel, which wants the banbles sold, because France has no more use for them than she has for the Kings and Emperors who used to wear them.
M. Gambetta's organ, the Republique
Française thinks that daspail's motion will be carried, but at the same time suggests that certain "captain jewels' of the regalia, which cannot be sold for anything like their full value, ought to be reserved for deposit in the national museums, as objects of art or

GBO. C JORDAN, Edit or and Propr ELEVATED railroads are still fashion able in the North. A new one was opened in New York city last week, the Second Avenue branch of the Metropolitan Line. The epidemic has even reached the quiet city of Philadelphia, and work on an elevated road in that city has already begun.

THE French and German standing armies at present are n point of numbers, the difference in fayor of Germany being only 9,000 men. The new army bill, however, which the German government is forcing through the Reichstag, will change all this and enable Germany to place from 2,500,000 to 3,100,000 men in the field in the event of the mobilization of its

DYNAMITE plots are all the rage. Close after the attempt made on the life of the Czar in the Winter Palace comes the attempt to blow up the St. Heller barracks on the island of Jersey, and now news is brought of an attempt made by a Greek at Constantinople to blow up the palace of the Sultan with an infernal machine he had invented. Several other countries are vet to hear from.

THE paper-makers of the West are making vigorous war upon the proposition to relieve the duty upon all articles that enter into the manufacture of printing paper. This is remarkable in view of the fact that they claim the present high price of paper is due to the eost of imported articles that enter into its manufacture. In the very nature of things they should favor the removal of the duty. An explanation of their conduct is probably given in the suggestion that they fear a repeal of the duty on material used in the manufacture of paper will be only a preliminary step to the repeal of the duty on paper itself.

THE Northern and Western papers unanimously agree that Lent is much less vigerously kept this year than ever before, but are unable to explain this on any other ground than our deterioration from the religion and belief of our ancestors. In St. Louis formerly three fast days a week were observed. during which no meat was eaten, whereas this year the fast days are only two a week, and even these are seldom observed. The markets of St. Louis and New York show no evidence of Lent, and are as full of all the luxuries of the season-fish, flesh and fowl-as if one-half of the population of these cities were not forbidden to partake of them.

THE trades unions of St. Louis promise to be the most thoroughly organized in the world. There are some hundred of these unions already in that city, embracing nearly every interest and industry, and the laborers employed in other enterprises are rapidly organizing. Last Saturday, for inized by the stove-makers, machinerymoulders, teamsters, plasterers, porters, painters and tanners. It was thought at first that these meetings were called for the purpose of organizing a general strike, but this proved incorrect, as they met simply to perfect organization. These guilds are now so strong that they completely control the St. Louis labor market and can bring their employers to terms whenever they desire to do so.

THE Pennsylvania Railroad originally extended from Harrisburg to Pittsburg, a distance of 248 miles. It now represents 128 distinct railroad organizations, owns and operates 6572 miles of road, and counting double and side tracks, 9249 miles. For twenty years it has been engaged in absorbing other roads, until it now bisects eleven of the most powerful States of the Union. It may be assumed that the day. policy that has heretofore governed the corporation will be continued, and that corporation will be continued, and that CAPITAL PRIZE, 30,000. the road will continue to extend its 100,000 TICKETS AT TWO DOLLARS arms in all directions until it extends into every section of the country. There are other overgrown railroad corporations in the country equally powerful, and all of them are grasping for more power. A half dozen lines will control the commerce of the country in a few years more if some means is not adopted to check them. The interstate commerce bill will become a law none too soon.

THE extent to which coin clipping has lately been carried has attracted the attention of the government, and, it is said, an attempt will be made to put an end to this annoying and troublesome habit. Clipped or perforated coins are not legal tenders and will not be received by the postmasters or any other government officials. Despite this fact, thousands of dimes and picayunes are every day mutilated, and it is probable that more than half our smaller currency is thus more or less clipped. These coins are taken by the smaller dealers, although they entail a loss on them, as this mutilated currency can only be sold at a discount. It was at first thought that this cutting, clipping and perforating of coins was done either to wear them as charms or from mere maliciousness, but the government has lately had reason to believe that a large number of persons were engaged in this clipping enterprise for the purpose of defrauding the government, and that quite a large income is made by these people by abstracting two or three cents worth of silver from every coin that passed through their hands. As the defacing of coin is a misdemeanor and punishable under the law, it is proposed to put this statute in execution and punish some of these coin-clippers.

Perhaps the best dinner table talkers in England are Lord Chief Justice Cockburn, Queen's Counseller, Judah P. Benjamin, W. E. Gladstone, Cardinal Manning, Lord Roseberry and Dean Stanley. If Thomas Carlyle could rejuvenate himself by twenty years he might be added to the list. I take it that Dean Stanley in a higher degree is the best general dinner table talker of the number I mention. Cardinal Manning is gifted in the art of words that convey thoughts, illumine the soul and the mind at once, and with equal though different brilliancy. He pleases you, and is pleased in doing so. You invariably learn something from his chaiming stories, his quiet wit, or his earnest truisms.

1880. DAILY, EXCEPTSUNDAY. 1880
A Paper for all classes of the People and in every Department of life.

Independent and Conservative.

THE SUN is conservative in politics, independent in tone and non-sectarian. Its proprietors point to the principles that have governed it in the past as a guarantee of its course in the future. On all subjects of public interest it will continue to express its opinions, according to its best judgment, with a view only to the promotion of the best interest of the public. All the freshest news, at home and abroad, excluding only that which is prurient or sensational, is given from day to day in its columns. In addition to what is furnished by the Associated Press and by the local reporters of The Sun, no expense is spared to keep its special correspondence, that from Europe as well as from the Pacific Coast, and from its Washington Bureau, abreast of the times, and to supplement it, as occasion may require, at every other point to which the current of events give prominence.

The Financial and Commercial Reports of The Sun contain at all times full and trustworthy accounts of all movements and operations in the leading markets, as well as that of Baltimore, with special telegraph service from New York of the latest stock and other transactions; while its reports of the ruling prices of breadstuffs, provisions, and other leading articles of trade and commerce, will embrace the latest intelligence, both at home and abroad, of each day's doings, up to the hour of going to press.

As a Paper for the People, filled with the freshest and most varied news, The Sun has acquired a reputation, not only locally, but in many of the States of the Union, makes it the most valuable medium for all classes of advertisers.

dies a Failure.

CUTICURA RESOLVENT, the Great Blood
Purifier and Liver Stimulant, is the most
searching, cleansing, and purifying agent
of this country. It may be detected in the
saliva, sweat, milk, blood, and urine in forty minutes after taking the first dose, showing that it has entered the circulation and
been carried to every part of the system.
It forever era ite tes the virus of Syphilis,
Scrofula, Caucer, and Canker, those terrible
blood poisons that rot out the machinery
of life, filling the body with foul corruptions. Taken internally in conjunction
with the externa application of CUTICURA,
the Great Skin Ctre, it speedily cures Scrofthe Great Skin Ct re, it speedily cures Scre ulous Ulcers and Old Sores, Salt Kheum, Psoriasis, Tetter, Ringworm Scald Head, Dandruff, and all Itching and Scaly Diseases of the Skin and Scalp.

Messis Weeks & Potter: Guəlemen—I cannot refrain from ad ing my debt of gratitude to you for having placed within my reach the wonderful Cuticula Remedies, which have rendered unnecessary all further experiment of physicians, and in a remarkably short space of time have rid me of a loathsome disease. I dispensed with all physicians two years ago, believing they did me no good. The Cuticula has stopped this unsatisfactory expense—even if it vere necessary and I had the courage any longer to follow their advice—and brought the long-looked-for cure and happiness. piness.

I have been afflicted with Eczema or Salt Rheum on my scalp, breast, and limbs for five years, during which time I have been under the treatment of physicians, or at mineral springs, or taking some kind of medicine. I have been treated by Drs—of—, Dr.—of—, and visited sulphur springs and taken numbers of patent medicines, all without the faintest approach to nes, all without the faintest approach to

icines, all without the faintest approach to a cure.

April 1st last, I began the use of Cuticura, which was immediately successful in my case, entirely curing me. I have not had a clean scalp for 15 years until the use of Cuticura entirely healed it and left it clean and healthy. The other parts of my body were affected in a more aggravated form, but are now completely healed. I believe myself completely cured. I shall continue the uticura Resolvent as directed, for its wonderful action on the stomach and bowels and cooling influence on the blood. It will afford me pleasure, as I have done in many cases, to urge the afflicted to use these wonderful remedies.

Yours, etc.,

STEPHEN CROWELL.

NEW BEDFORD, Sept. 30, 1878.

Messrs. WEEKS & POTTER:-Some three or Messrs. Weeks & Potter:—Somethree of four weeks ago I ordered a box of Cutticura for a bad case of Sait Rheum. The back of one of my wife's hands was arunning sore. In one week from the day it arrived her band was well and has remained so up to to-day.

# A Rare Chance for Invest-

Wishing to give my whole attention to the lumber trade, in which I am about to engage on a larger scale than ever before, I offer for sale on terms to suit the times the following valuable property in Cary:

MY PLUG TOBACCO FACTORY, in a BRICK building 50x80 feet, 3 stories high, the lower story being two large storerooms. The Tobacco Machinery is new and has a capacity of manufacturing 1,000 lbs. per day. The factory has been worked a year, and a good beginning for a trade has been made. The building and the machinery will be sold together, or separately to suit purchasers.

GRAIN MILLS.

in a 3 story brick bullding, 28x40 feet. Two Wheat Mills and one Corn Mill, new and complete with a capacity for grinding 100 bushels of wheat and 100 bushels of corn a day, and can compete in quality of flour with any mills in the State. The mills have had a very large local patronage during the past year. They are driven by a 60 Horse Power Steam Engine, improved, of the make of Talbott & Sons, Richmond.

Attached to the engine is also a 60 Saw Cotton Gin and power press, at a safe distance (about 100 feet) in a different lot. The engine has a brick smoke-stack 60 feet high, making the danger from fire the least possible and the rate of insurance very low.

Several well built and handsome residences, with lots and gardens of about 1 acre to each dwelling. They are wooden buildings, 2 stories high, with from 5 to 7 rooms each situated in desirable locations in the village.

Besides these, 4 one acre lots, with cottage buildings of 2 rooms. buildings of 2 rooms.

SIDEWALK NOTES.

TIM LEE.-Local notice. DR. PIERCE.—Local notice. L. E. Brown & Co.—Agents wanted,

-New moon to-night. -It seems that there is a decrease in the pigeon crop.

—Only a few more fresh oyster weeks. Then what? ---Our merchants are filling up, the

season for which is at hand. -The mud supply is up to the expectations of the most sanguine. -Blake has 300 tons of Maine ice

on route, to keep the citizens cool. -The Mintrels at Metropolitan Hall next Monday night are looked for anxiously by the boys.

-Mr. and Mrs. James Boylan returned to the city yesterday from their bridal tour to New Orieans.

Twenty-four thousand dollars' worth of old bonds were surrendered for exchange at the State Treasury yes--It will no doubt be gratifying to

our readers to state that the weather is now clearing up and the mud trouble -The regular semi-monthly meeting of St. John's Guild will be held at the Reading Room this (Wednesday)

evening at 8 o'clock. -Col. J. M. Robinson, President of the R. & G. and R. & A. A. R. R's. and Wm. W. Chamberlain, Tresurer of the Seabcard railroad arrived in the city

-The neighboring streams are much swollen in consequence of the recent heavy rain fall. This is the first time it has been the case within the past two years.

-Captain B. P. Clifton, of Louisburg, has been in the city for several days past stopping with his sister-in-law Mrs. Strange. He leaves this morning for his home.

-The game of ten pins occupies the attention of the young men of the city to an unusual degree at this time. The balls roll in Lincke's Hall some nights 'til day break.

-Work on the University railroad is being pushed forward with unusual energy and it is understood that Chapel Hill will be reached at an earlier date than was first calculated on. -The late cold weather has caused

a good deal of suffering among the poor of the city and the demands upon the depleted funds of the Young Men's Christian Association have been unusual.y large. -We regret to learn through a private letter of the severe illness of Mr

Higgs, at the Eutaw House, Baltimore, who, for a number of years, so acceptably served as chief salesman in Mr. Creech's store of this city. The city boarding houses are be-

ing put in order against the arrival of the members of the Legislature on Monday next. It is said that accommodations in this line will be better than they have heretofore been. -The game of fifteen is the biggest

puzzle-fool that ever puzzled the brain of the puzzler. The young men of Raleigh have found it a master piece of foolishness, and one that can kill more valuable time than anything else.

-The sale of the Western North Carolina Raiiroad is to be discussed for and against by the Raleigh Literary Society on the evening of the 22d inst. It is now generally discussed by the public, and the prevailing opinion is in favor of the sale.

----We were in error as to the buggy accident mentioned in our local col-umns of yesterday. The cause of the trouble was the breaking of the iron holding the shaft to the axle. The horse was soon checked, there was no overturn or injury of any kind.

Redeem Your Real Estate. The last Legislature passed a law allowing persons whose land had oeen sold to the State for non-payment of taxes, to redeem the same upon payment of ten per cent., in addition to other charges, provided these charges be paid before the 13th of March, 1880. After that date, the per cent. will be nearly three times as large. Parties interested should therefore lose no time in redeeming their real estate. The Ladies' Favorite.

Among the many thousands of ladies who have used Dr. Pierce's Favorite Prescription and pronounced it their favorite remedy, because so efficient in the diseases and weaknesses peculiar to women, are many who are well and favorably known in the world of letters, as well as artists, musicians, and a whole host of names from the brilliant ranks of wealth and fashion. It is preeminently the ladies' Favorite Prescription, its use, while being far more safe and efficient, exempting them from those painful, caustic operations, and the wearing of those mechanical contri-vances made like Peter Pindar's razor sellers' razors-to sell, rather than to

Doctors Will Differ.

The following characteristic letter speaks for itself; is plain English; needs no interpreter. Read it: NEW MADISON, OHIO. February 18, 1880.

Messrs. Landrum & Litchfield, Abingdon, Va.:—Gentlemen: Inclosed find \$5.00 for another dalf dozen bottles of the Seven Springs "Iron and Alum Mass." My wife's health is better this winter than it has been for years, and I bave spent hundreds of dollars for medicines and physicians' bills, but the "Iron and Alum Mass" is the cheapest remedy I have found, and has done the most good, consequently I am encouraged to continue its use, notwithstanding our family physician says it is for RICH PEOPLE with nothing much the matter with them. Well, we are not rich, and I suppose it operates differently on POOR PEOPLE. My wife has been an invalid for years, and is getting better "Doctors will differ." Send me the Mass. Experience is better than logic. Respectfully,
